On behalf of the Missouri Tourism Commission, it is with pleasure and pride that I report to you on the state of tourism in Missouri.

With our industry partners we have made tourism one of Missouri’s leading revenue producers, which, in the fiscal year ending June 30, 2005, reached record levels in generating sales tax revenues, was responsible for employing nearly 285,000 Missourians, and remained a $13.4 billion industry for our state.

As the chart below demonstrates, in FY05 the Division of Tourism prudently invested nearly 86 percent of its budget on advertising and marketing. We are confident that this aggressive marketing strategy will ensure that our messages continue to resonate with travelers amid increasingly aggressive competition from our neighboring states for those travelers’ attention and dollars.

We are excited about the opportunities that await us and we applaud our partners in Missouri’s hospitality industry for making our state a national model of success and cooperation in the promotion of tourism.

WELCOME CENTERS

In cooperation with the Missouri Department of Transportation, the Division of Tourism operates six Welcome Centers located in rest areas along the interstate highway system at key entry points around the Missouri border: Hannibal, Joplin, Kansas City, New Madrid, Rock Port and St. Louis.

These centers distribute information about events to attend and attractions to visit throughout Missouri. Thousands of brochures are available to guide visitors as they pursue their Missouri vacations.

In addition to distributing information, the Welcome Centers help MDT collect data; tracking visitation by season, geographic origin and modes of transportation.

Research provides a road map to help MDT make more informed marketing decisions and monitor the success of the division’s strategies:

BUDGET HISTORY

Missouri’s tourism funding formula often is recognized as a model for the nation. Other states, including Colorado, Iowa, Kansas, Maryland, Minnesota, Montana, Nebraska, North Carolina, Ohio, Rhode Island and Wisconsin have studied, adopted or are considering implementing funding plans patterned after Missouri’s.

Conceived by industry members, the formula has allowed the Division of Tourism to fund itself from growth in the industry while reducing the division’s need for traditional General Revenue Fund appropriations. The performance-based formula has provided for the Missouri Division of Tourism budget to grow from $6 million per year to $17.8 million for FY05. (Actual funding for FY05 was $16.8 million.)

State Law RSMo 620.467, known as the Tourism Supplemental Revenue Fund (TSRF), works by identifying sales tax revenue generated by businesses that serve travelers. A percentage of the growth in sales tax revenue from businesses that fall within 17 tourism-related Standard Industry Classification (SIC) codes is used to determine the growth in the TSRF. The formula also allows for 3 percent inflation each year. Once the 3 percent threshold is reached, one-half of the additional growth is used to determine the funding. The fund cannot grow by more than $3 million in any one year.

In addition, a provision in the law requires that the original FY94 General Revenue core be systematically eliminated by FY04. These reductions were accelerated such that the division was funded 100 percent through the TSRF in FY02, two years earlier than mandated.

In 1998 and 2002, the General Assembly passed legislation to enhance the original state law. One of the outcomes was to extend the sunset clause to June 2010.

Increases in the TSRF appropriation allow for additional investment in tourism marketing and promotion. Through this performance-based budget, the division expanded its marketing message to new audiences while offering a cooperative matching funds program to local tourism organizations. This places Missouri in a better position to raise awareness of travel opportunities within our state and compete with neighboring states for traveler expenditures.

The number of residents employed in tourism-related industries increased by 6,342 from FY04 to FY05.
